EXPERIENCE

BNY Pershing · Product Designer, Wealth Services

Sep 2023 – Present

Regulated wealth operations platform for advisors and institutions — end-to-end ownership of dense, multi-state workflows where accuracy, exceptions, and speed matter.

- Lead designer on Fully Paid Lending: owned a complex desktop ops surface end to end (dashboard, enrollment, multi-state lending flows) now live in NetX for all Introducing Broker-Dealers; a March beta partner lent \$27M in a day (\$49.9k to the investor, \$10.7k to the IBD).
- Co-led New Account Opening and Asset Movement with Product and Engineering: discovery, systems-level patterns, and high-fidelity prototypes that clarify multi-step operational journeys, reduce friction around compliance edge cases, and scale interaction patterns across pods.
- Redesigned alternative investment order entry with streamlined AI-enabled document upload — cut drop-off in a document-heavy qualification workflow while keeping automation transparent and requirements intact.
- Partnered with internal teams on AI-enabled workflows and design-system patterns for the Wealth Services design team; prototypes and ships in Figma and code with engineers and PMs using Devin, ChatGPT, and Codex.
