EXPERIENCE

BNY Pershing · Product Designer, Wealth Services

Sep 2023 – Present

Enterprise platform for advisors and institutions — systems-heavy, multi-surface product work across New Account Opening, Asset Movement, Fully Paid Lending, and Wove. Hands-on from ambiguous brief to shipped experience with product, engineering, research, and design partners.

- Lead designer on Fully Paid Lending: owned a complex end-to-end experience — dashboard, digital enrollment, states, and edge cases — now live in NetX for all Introducing Broker-Dealers; a March beta partner lent \$27M in a day (\$49.9k to the investor, \$10.7k to the IBD).
- Co-led New Account Opening and Asset Movement: high-fidelity Figma prototypes, clear content and interaction language, and reusable patterns that help sophisticated users finish multi-step journeys across desktop workflows.
- Redesigned alternative investment order entry with streamlined AI-enabled document upload — cut drop-off in a document-heavy client workflow while keeping compliance requirements intact.
- Partnered with internal teams on AI-enabled workflows and patterns for the Wealth Services design team; explores concepts and ships faster with Devin, ChatGPT, and Codex while delivering in both Figma and working prototypes.
