EXPERIENCE

BNY Pershing · Product Designer, Wealth Services

Sep 2023 – Present

Enterprise wealth platform for advisors and institutions — systems-heavy product work where visual consistency, reusable components, and clear documentation keep complex journeys coherent across New Account Opening, Asset Movement, Fully Paid Lending, and Wove.

- Lead designer on Fully Paid Lending: defined reusable dashboard and enrollment patterns, states, and edge cases now live in NetX for all Introducing Broker-Dealers; a March beta partner lent \$27M in a day (\$49.9k to the investor, \$10.7k to the IBD).
- Co-led New Account Opening and Asset Movement: high-fidelity Figma specs with typography, spacing, and interaction language that scale across desktop workflows; partnered with engineering on accurate implementation and accessibility-minded handoff.
- Grew a shared pattern library for Wealth Services — documented components and content rules so product and design teams ship consistent UI instead of one-off screens.
- Partnered with internal teams on AI-enabled workflows and patterns for the design team; uses Devin, ChatGPT, and Codex to accelerate exploration and documentation while delivering in both Figma and working prototypes.
