EXPERIENCE

BNY Pershing · Product Designer, Wealth Services Sep 2023 – Present

Regulated wealth platform for advisors and institutions — end-to-end ownership of complex workflows where trust, clarity, and edge cases matter as much as speed.

- Lead designer on Fully Paid Lending: shipped a complex product end to end under ambiguity — dashboard, digital enrollment, and multi-state flows now live in NetX for all Introducing Broker-Dealers; a March beta partner lent \$27M in a day (\$49.9k to the investor, \$10.7k to the IBD).
- Co-led New Account Opening and Asset Movement with Product, Engineering, and research partners: defined primitives and high-fidelity prototypes that clarify large multi-step journeys and improve consistency across broader flows.
- Redesigned alternative investment order entry with streamlined AI-enabled document upload — cut drop-off while keeping automation transparent and compliance requirements intact so users can trust what the system is doing.
- Partnered with internal teams on AI-enabled workflows and patterns for the Wealth Services design team; designs and prototypes in Figma and front-end code with Claude Code, Devin, and Codex in the loop.
