EXPERIENCE

BNY Pershing · Product Designer, Wealth Services Sep 2023 – Present

Regulated wealth platform for advisors and institutions — complex analytical workflows where polish, clarity, and edge cases have to hold under real constraints.

- Lead designer on Fully Paid Lending: shipped a complex B2B product end to end under ambiguity — dashboard, digital enrollment, and multi-state flows now live in NetX for all Introducing Broker-Dealers; a March beta partner lent \$27M in a day (\$49.9k to the investor, \$10.7k to the IBD).
- Co-led New Account Opening and Asset Movement with Product, Engineering, and research: defined primitives and interaction patterns for large multi-step journeys so new capabilities stay consistent across the platform.
- Invented AI-native patterns for alternative investment order entry — streamlined document upload with transparent automation — cutting drop-off while keeping users oriented on what the system is doing.
- Prototype in Figma and front-end code with Claude Code, Devin, and Codex as creative partners; ship polished UI that builds trust, then translate validated flows into production with eng partners.
