EXPERIENCE

BNY Pershing · Product Designer, Wealth Services Sep 2023 – Present

Enterprise wealth platform for advisors and institutions — owning end-to-end design on high-stakes product surfaces where visual craft, design-system consistency, and a tight design-to-production loop matter as much as the workflow itself.

- Lead designer on Fully Paid Lending: owned enrollment and dashboard end to end — high-fidelity Figma through pixel-level handoff now live in NetX for all Introducing Broker-Dealers; a March beta partner lent \$27M in a day (\$49.9k to the investor, \$10.7k to the IBD).
- Co-led New Account Opening and Asset Movement with Product and Engineering: research through iterative high-fidelity prototypes that raise the visual and interaction bar on multi-step journeys while shipping at platform scale.
- Maintain reusable UI patterns and annotations so dense flows stay consistent across surfaces; partner with engineers on clear component-level handoff that keeps craft high through build.
- Partnered with internal teams on AI-enabled Wealth Services workflows and patterns — uses Devin, Codex, and Claude Code to speed ideation through production without sacrificing craft.
