EXPERIENCE

BNY Pershing · Product Designer, Wealth Services Sep 2023 – Present

- Enterprise wealth platform for advisors and institutions — regulated, operationally dense workflows where systems thinking and end-to-end ownership matter as much as visual craft (fintech / enterprise ops adjacency).
- Lead designer on Fully Paid Lending: owned a high-impact domain end to end — research, conceptual flows, high-fidelity prototypes, and production-ready assets now live in NetX for all Introducing Broker-Dealers; a March beta partner lent \$27M in a day (\$49.9k to the investor, \$10.7k to the IBD).
 - Co-led New Account Opening and Asset Movement with Product, Engineering, and operations partners: navigate ambiguity to define interaction patterns where sophisticated commercial users move money and open accounts.
 - Contribute reusable components and patterns within a platform-scale design system so dense operator flows stay consistent as the product expands.
 - Partnered with internal teams on AI-enabled Wealth Services workflows; uses Devin, Codex, and Claude Code to keep discovery fast while storytelling design rationale clearly to technical and non-technical partners.
