EXPERIENCE

BNY Pershing · Product Designer, Wealth Services Sep 2023 – Present

Enterprise wealth platform for advisors and institutions — account linking, permissioned access, and regulated authorization surfaces where consent, identity settings, and informed choice have to stay simple across web workflows.

- Design end-to-end account and identity journeys that turn complex authorization models and consent frameworks into transparent, frictionless UX — disclosures, enrollment, and permission management advisors and partners can complete with confidence.
- Lead designer on Fully Paid Lending: owned UX from ideation through launch — enrollment and dashboard now live in NetX for all Introducing Broker-Dealers; a March beta partner lent \$27M in a day (\$49.9k to the investor, \$10.7k to the IBD).
- Co-led New Account Opening and Asset Movement with Product, Engineering, Legal/privacy, and research: wireframes through interactive prototypes and usability-minded handoff across authentication, sign-up, and multi-step permission flows.
- Partnered on AI-enabled Wealth Services patterns and scalable UI aligned to the design system; uses Devin, Codex, and Claude Code for ideation through production so exploration stays fast without sacrificing craft or privacy-by-design clarity.
