EXPERIENCE

BNY Pershing · Product Designer, Wealth Services Sep 2023 – Present

Enterprise wealth platform for advisors and institutions — regulated product surfaces where users discover offerings, complete commercial actions, and clarity has to survive operational load.

- Lead designer on Fully Paid Lending: owned the problem end to end — research, conceptual flows, high-fidelity prototypes, and production-ready assets that help partners discover and complete a new securities-lending offering; now live in NetX for all Introducing Broker-Dealers; a March beta partner lent \$27M in a day (\$49.9k to the investor, \$10.7k to the IBD).
- Co-led New Account Opening and Asset Movement with Product, Engineering, and operations: turned ambiguous requirements into clear interaction patterns for multi-step commercial journeys, covering empty and error states so completion holds under real operator load.
- Contribute reusable components and patterns within a platform-scale design system so dense product surfaces stay simple and consistent as offerings expand.
- Partnered with internal teams and UX partners on AI-enabled Wealth Services workflows; prototypes and ships with eng in Figma and code using Devin, Codex, and Claude Code, and stories the rationale clearly to technical and non-technical stakeholders.
