EXPERIENCE

BNY Pershing · Product Designer, Wealth Services Sep 2023 – Present

Enterprise wealth platform for advisors and institutions — regulated, multi-step money journeys where every step, state, and edge case has to stay clear under constraint.

- Co-led New Account Opening and Asset Movement with product, engineering, and research: redesigned information architecture and end-to-end flows for two flagship multi-step journeys, keeping required disclosures, review states, and edge cases visible without burying the path to completion.
- Lead designer on Fully Paid Lending: took an ambiguous new revenue product from concept to launch — enrollment, dashboard, and earnings states now live in NetX for all Introducing Broker-Dealers; a March beta partner lent \$27M in a day (\$49.9k to the investor, \$10.7k to the IBD).
- Raised clarity and trust across dense financial surfaces — typography, hierarchy, spacing, and interaction states — and contributed reusable patterns back to the Wealth Services design system so quality holds as flows scale.
- Built functional prototypes in Figma and code with Devin, Codex, and Claude Code; partnered with internal teams on AI-enabled workflows that keep human control and recovery visible, and mentor designers on systems and craft.
