EXPERIENCE

BNY Pershing · Product Designer, Wealth Services Sep 2023 – Present

Enterprise wealth platform for advisors and institutions — on the ground floor of Wove, a multi-year rebuild of core advisory workflows where adaptive, multi-step self-service has to stay clear under regulation.

- Co-led New Account Opening and Asset Movement on Wove and NetX: mapped end-to-end journeys, edge cases, failure states, and handoffs so advisors and home-office teams can complete dense self-service flows without losing required review or audit steps.
- Lead designer on Fully Paid Lending: independently drove an ambiguous product from discovery through delivery with PM and engineering — enrollment, dashboard, and position views now live in NetX for all Introducing Broker-Dealers; a March beta partner lent \$27M in a day (\$49.9k to the investor, \$10.7k to the IBD).
- Contributed reusable components, interaction patterns, and annotated specs back to the Wealth Services design system so adaptive journeys stay consistent as new features land across teams.
- Prototype AI-enabled document-upload and workflow patterns with Devin, Codex, and Claude Code while keeping human review and control visible; partnered with internal teams to develop AI-enabled patterns for the Wealth Services design team, and present decisions to product, engineering, and leadership.

Collective Design · Design Advisor 2024 – Present

Advise early-stage AI and product startups on interaction craft and systems thinking for technical products where trust and clarity matter as much as speed.
