EXPERIENCE

BNY Pershing · Product Designer, Wealth Services Sep 2023 – Present

Enterprise wealth platform for advisors and institutions — owning major product areas from early problem framing through polished production UI where multi-step workflows have to stay simple under real constraints.

- Lead designer on Fully Paid Lending: owned concept through shipped production UI with product and engineering partners — dashboard, digital enrollment, states, and edge cases now live in NetX for all Introducing Broker-Dealers; a March beta partner lent \$27M in a day (\$49.9k to the investor, \$10.7k to the IBD).
- Co-led New Account Opening and Asset Movement: turned loosely defined advisor problems into clear journeys — research, prototypes, and interaction patterns that make complicated money flows feel approachable without stripping required power.
- Partnered with internal teams on AI-enabled workflows and human-in-the-loop patterns for Wealth Services (including transparent document-upload automation) so operators understand what the system is doing and when they need to intervene.
- Grew shared design-system primitives and craft standards across Wealth Services; prototypes in Figma and code with Devin, Codex, and Claude Code to explore direction fast, then ship production-ready UI with eng partners.
