

John Rubino

Senior product designer in New York, designing complex financial products for advisors and building with AI.

Summary

I design complex financial workflows for advisors at BNY Pershing and build with AI. My lending redesign helped a client lend a **\$27M** position in a single day, and I’m one of three designers leading AI adoption for the Wealth Services design team.

Experience

BNY Pershing | Senior Product Designer · Wealth Services Sep 2023 – Present

- Led the redesign of Fully Paid Lending with a design lead, product, and engineering, partnering with a researcher on **5** studies to learn why advisors had written off a tool that lacked context, made positions hard to find, and lost them at enrollment. Launched to all Introducing Broker-Dealers, generating revenue for firms and their investors, including a **\$27M** position lent in a single day.
- Selected by design leadership as one of **3** designers leading AI adoption for the Wealth Services design team. Built and presented a learning series on building with our design system in AI tools, and now documenting how designers can pull answers directly from design system guidance.
- Led the redesign of single order entry for alternative investments. Interviewed **8** clients with product to uncover pain points: scattered documents, re-keyed trades, and manual operations checks. Designed a document-upload-first flow with AI-assisted data extraction that consolidated the process into one step, projected to cut wire creation errors by about **90%**.
- Co-designed New Account Opening and Asset Movement to reimagine Pershing’s wealth platform. Partnered with user research to interview **12** advisors on how they open accounts and move client money, then validated prototypes with **20** advisors across two usability studies, which reshaped both flows and revealed a confirmation screen telling advisors an account existed before it did.

Collective Design | Design Advisor 2024 – Present

Advise early-stage startups on product strategy and design.

Purple Panda Rentals | Founder & Product Designer Sep 2020 – Feb 2023

Founded a rental platform for college students after hearing from friends how hard the off-campus housing search was. Surveyed **270** students, designed the mobile app, and used usability testing to raise task completion from **63%** to **100%**. Reached **100+** sign-ups and increased referrals by **20%**.
