EXPERIENCE

BNY Pershing · Product Designer, Wealth Services Sep 2023 – Present

Enterprise wealth platform for advisors and institutions — analytical, regulated surfaces where hierarchy, auditability, and micro-details have to hold once engineering ships them.

- Lead designer on Fully Paid Lending: owned concept through shipped production UI — dashboard, digital enrollment, investigation-like position views, and edge-case states now live in NetX for all Introducing Broker-Dealers; a March beta partner lent \$27M in a day (\$49.9k to the investor, \$10.7k to the IBD).
- Co-led New Account Opening and Asset Movement: established triage-friendly hierarchy, reusable interaction patterns, and specs across data-dense journeys so teams ship consistent surfaces instead of one-offs.
- Grew shared Wealth Services patterns — components, annotations, and accessibility-minded details that raise craft and make platform-wide changes more reliable for expert practitioners.
- Prototype AI-assisted document-upload and workflow patterns with Devin, Codex, and Claude Code while keeping human control visible — then translate validated flows into production-ready UI with eng partners.
